

Cutting Through The Noise

Our popular pick and mix, in-school modular session available for Key Stage 5.

Choose from seven 15 or 20 min modules, to tailor to the needs of your learners, supporting their informed transition into higher education.

Modules can be combined to create full 1-hour sessions to include questions and in-depth discussions, and can be delivered to a classroom or assembly groups of learners.

01

Choosing a university

An overview of all the factors to take into account when making university options choices, including the type of campus, the style of teaching and the importance of research.

03

Overview of admissions

Understanding what universities are looking for in a candidate and how to demonstrate it, including personal statements and making the most of personal experiences.

05

Overview of student finance

Busting debt myths surrounding university finance and explaining how it is affordable for all.

07

Understanding university jargon

An interactive session, most suitable for smaller groups which explores and explains jargon students may come across when researching their university options.

02

Choosing a course

Exploring the details needed when making course choices, including the importance of research, the difference between BSc/BA and onward career options.

04

Apprenticeships and degrees

Unpicking what they are and how to apply, including pros and cons, what to expect and giving yourself the best chance of success.

06

Navigating UCAS

What is UCAS, how does it work and how to make the most of it, including helpful features.

 In-school

 Seven modules available, mix and match
